

Proposed statement for moving in and care conference checklists for long-term care

You will be reviewing your medications at your upcoming meeting with your care team. You can prepare for a medication review by completing this "medication record"

(<https://deprescribing.org/deprescribing-in-ltc-framework/Medication-Record/>) and bringing it to the meeting. Think about your experiences and goals for each medication. This will help you and the care team made good decisions about continuing or changing your medications. More information about shared decision-making about medications can be found here: <https://deprescribing.org/deprescribing-in-ltc-framework/>.
